Profile

Third-year Software Engineering student at ENSA Kénitra with hands-on experience in web development (HTML, CSS, PHP, Python) and database design. Seeking an initiation internship to apply my technical skills on real-world projects and grow within a professional development environment. **Available from June 2026.**

Education

Engineering Cycle – Computer Engineering, ENSA Kenitra	2025 – Present
---	-----------------------

Preparatory Cycle, ENSA Kenitra 2023 – 2025

International Baccalaureate – physical sciences and chemistry, Ibrahim Elmoussili High School, Kenitra 2022 – 2023

Professional Experience

Robotics Instructor · *Oxford Centre (Volunteer)* – Sale

01/2025 – Present

- Delivered beginner-friendly robotics sessions to children and teenagers.
- Designed course materials adapted to different skill levels.
- Supervised hands-on robotics projects from concept to demonstration.

Mathematics Tutor · *My High School – Baccalaureate Support (Volunteer)* – Sale 02/2026 – Present

- o Tutored final-year high school students in mathematics..
- o Helped students prepare for national baccalaureate exams.

Academic Projects

Hotel Management Web App

12/2025 – 01/2026

- Designed the full database schema: ERD, logical and physical models.
- Developed the web application using Python (Streamlit) connected to MySQL.
- Wrote complete SQL scripts: table creation, relationships, and queries.
- Managed version control with GitHub and containerized the app using Docker.

Tools: Python, Streamlit, MySQL, GitHub, Docker.

Data Analysis Project 11/2025 – 12/2025

- Explored and cleaned a real-world dataset using Pandas and NumPy.
- Generated insightful visualizations and statistical charts with Matplotlib.

Tools: Python, Pandas, NumPy, Matplotlib, Jupyter Notebook.

Static Web Pages 03/2026 – 04/2026

- Designed and built multiple representative websites using HTML5 and CSS3.
- Applied responsive design principles with Bootstrap.

Tools: HTML, CSS, Bootstrap, VScode.

Technical Skills

Languages: HTML, CSS, PHP, Laravel, C, C++, Python, R, JavaScript (basics) .

Frameworks / Libs: Bootstrap, Streamlit, Pandas, NumPy, Matplotlib .

Databases: SQL, PLSQL, UML, Data modeling (ERD / Logical / Physical) .

Tools: GitHub, Docker, VS Code, Pycharm, ArgoUML, Script R, CodeBlocks, SQL Workshop, Dbeaver, Oracle.

Achievements & Involvement

2nd Place – Robotics Competition - Mechatronics Club – ENSA

09/2024 – 08/2025

- Designed and programmed a competitive robot within a strict time frame.
- Collaborated in a team under pressure to deliver a functional prototype.

Campaigns Manager – AFAAQ Associative Club	09/2025 – Present
--	-------------------

- o Organized and coordinated cultural and community awareness campaigns.
- o Led team coordination and maintained partnerships with external stakeholders.

Languages

- **Arabic:** Native

- **French:** Fluent

- **English:** Fluent

Interests

- Essay Writing

- Reading (Articles/Essays)

- Teaching & Mentoring
